Summary — A master student seeking an alternance starting in September 2026 in data science, machine learning, and artificial intelligence (AI)

Education

- Université Paris-Saclay** Sept 2025 – 2027
Master Year 1 (M1) in Applied Mathematics Évry, France
– The course focuses on data analysis, machine learning, pattern recognition and biometrics, statistical modeling, stochastic processes, operations research and object oriented programming
- École Nationale Supérieure d'Informatique pour l'Industrie et l'Entreprise** Sept 2024 – 2027
Engineering Degree in Applied Mathematics Évry, France
– The course focuses on computer science, applied mathematics, probability, statistics, graph theory, optimization, databases, operating systems and shell scripting
- Institute of Technology of Cambodia (ITC)** 2021 – 2026
Engineering degree in Applied Mathematics and Statistics Phnom Penh, Cambodia
– The courses focus on computer science, applied mathematics and statistics, data science, and machine learning

Experience

- AI FARM ROBOTICS | AI Engineer intern | Phnom Penh, Cambodia** May 2025 – Aug 2025
Title: Develop a speech-to-speech conversational agent system with real-time interruption
– Develop a modular automatic speech recognition (ASR), large language model (LLM), text-to-speech (TTS)
– Real-time speech-to-speech pipeline integrating ASR, LLM, TTS using a multi-threaded architecture for concurrent execution

Projects

- Time Series Rupture Detection for Aerospace Stocks**  | *Python, SciPy* Feb 2026 – Apr 2026
– Detected structural breaks in adjusted close prices of 10 aerospace companies using Hanning filtering, Kolmogorov–Smirnov scan for optimal rupture point, joint MLE of skew-normal distributions
- Breast Cancer Survival Classification using Clinical & Genomic Data**  | *R* Nov 2025 – Jan 2026
– Analyzed high-dimensional clinical and genomic data from 1,230 patients (24 clinical features and 5,000 mRNA transcripts), performing differential expression analysis, multivariate statistical testing, dimensionality reduction, class imbalance handling with SMOTE, and implementing six penalized regression models with embedded feature selection
- Credit Score Analysis and Prediction**  | *Python, Machine Learning* Oct 2025 – Dec 2025
– Conducted end-to-end credit risk analysis by applying statistical inference, exploratory data analysis, dimensionality reduction, and customer segmentation, and built and evaluated supervised learning models for credit default classification and credit score regression using standard performance metrics

Skills

Languages : Python, R, C, C++, Java, OCAML, SQL, HTML, CSS, PHP
Libraries : Numpy, Pandas, Matplotlib, Seaborn, Web Scraping, Scikit-learn, PyTorch
Technologies/Developer Tools : $\LaTeX$, Microsoft Office, Jupyter notebook, Git, VS Code, Eclipse, Debian, Ubuntu, Window
Soft skills : Curious, Independent, Problem-solving, Teamwork

Certificates

- Hi!ckathon – AI Data Science Hackathon** December 2025
Organized by Hi! PARIS Center – AI for Science, Business & Society Palaiseau, France
Data Science Camp January 2024
Course organized by UNESCO UNITWIN and the Ministry of Education, Republic of Korea. Phnom Penh, Cambodia

Languages

Khmer: Native proficiency **English:** Professional working proficiency **French:** Limited working proficiency

Others

Club: Participation in the DataSciEence association at ENSIIE **Hobbies:** Traveling, Football, Volleyball
